TECMA-PLATA

SILVER, COPPER AND BRASS OBJECTS CLEANING BY IMMERSION

CHARACTERISTICS

TECMA-PLATA is a chemical detergent with a reductor character, especially formulated for cleaning operations by immersion of objects made of silver, copper, brass, etc., such as cutlery, trays, decoration objects, etc., no needing to scrub. Due to its special composition, the active components of **TECMA-PLATA** reduce oxidation stains produces by contact of this type of metals with air and environmental humidity.

METHOD OF USE

TECMA-PLATA can be used pure, or more frequently, diluted with different amounts of water. In general, the cleaning speed will depend on the concentrations, so the higher the concentration, the faster the cleaning.

Prepare the solution of **TECMA-PLATA** in water and immerse the objects to be cleaned, for about 1 minute (the necessary immersion times, will also depend on the dirt degree of the object)

Rinse with plenty of water and finally dry with a dry cloth which leaves no remains. The cleaning baths made of **TECMA-PLATA** dilutions are long-lasting if kept in tightly closed containers after being used.

PRECAUTIONS

Do not swallow. Harmful if swallowed. Keep out of the reach of children. Irritating to eyes and skin. Avoid contact with eyes and skin. In case of contact with eyes, wash immediately with plenty of water and seek medical advice.

PACKAGING

TECMA-PLATA is packaged in 10, 30 and 60 litres non-reusable plastic containers.
